

March 6, 2024

Dear Governor Healey and Lieutenant Governor Driscoll,

We are sending this letter with over 168 organizations and 377 individuals who join us in expressing our deep gratitude for your commitment to early education and care and school age programs this fiscal year. We are excited to see you prioritize these investments in a year with a difficult economic environment and limited revenue growth.

We are particularly grateful for the inclusion of the following investments in addition to many others in the sector:

- **\$475 million** in annual funding to sustain the Commonwealth Cares for Children (C3) operational funding for early education and care (EEC) providers;
- **\$75 million** to increase access to EEC financial assistance for additional families
- **\$20 million** to increase the reimbursement rate for providers who accept family financial assistance, bringing it closer to the cost of care; and
- **\$15.5 million** to expand the Commonwealth Preschool Partnership Initiative (CPPI), which supports local communities to expand preschool in the mixed delivery system.

Your continued support and advocacy for such critical components demonstrates your dedication to creating a robust and accessible early education and care system for all Massachusetts families. Thank you for your leadership, as these investments not only address immediate needs, but also lay the foundation for further systemic change.

The Commonwealth Cares for Children (C3) operational grant program supports the critical infrastructure of child care for all children and families in Massachusetts, providing a stable source of foundational revenue to address day-to-day operational costs. We are leading the nation - Massachusetts is one of just a few states to continue this essential funding stream after the expiration of the federal program.

The C3 grant program is stabilizing the sector - the state's capacity has rebounded and now exceeds pre-pandemic capacity, enrollment has increased and programs are serving a higher number of children. The funding is primarily going towards workforce-related expenses, including existing payroll and benefits and investments in salary increases without passing on the costs to parents.

Over the past few years, Massachusetts has made substantial and necessary improvements to the rate of reimbursement for financial assistance, bringing it closer to the actual cost of providing care and federal benchmarks. However, the rate remains 20-30% below the cost of care and what is charged in the private market. Your budget's investment in the reimbursement rate will improve access to child care financial assistance by increasing the number of programs that are willing and able to accept vouchers, allow programs to invest in quality, and directly raise workforce salaries for subsidized child care providers.

Your proposed rate increase, coupled with the C3 operational grant program, will continue to shrink the gap between the financial assistance provided to programs on behalf of eligible families and the actual cost of delivering services. Once this critical milestone is achieved, we can begin to look at costs associated with increased educator salaries and start to make meaningful progress on educator compensation.

Your investments in child care affordability also recognize the importance of supporting working families. This funding will provide access to child care financial assistance for families currently on the waitlist and allows for the prioritization of specific populations including staff working in licensed early education, out of school time and residential facilities.

Additionally, your plan to expand preschool access through the Commonwealth Preschool Partnership Initiative (CPPI) underscores the state's commitment to fostering early learning environments across the mixed delivery system. Your investment in this program recognizes the vital role family child care programs, center-based programs, and school districts play in the delivery of preschool. By fostering local partnerships and encouraging collaboration, we can create a seamless and inclusive and equitable early educational experiences for every child.

These investments ensure a comprehensive approach to financial stability, addressing both the operational needs of child care providers and the affordability concerns of families, ultimately fostering a robust and sustainable child care market.

Thank you for your investment.

Please contact Amy O'Leary at aoleary@strategiesforchildren.org if you need additional information.

Thank you!
